

## Pregnancy Rate in Hawaii for Females Aged 15-19 Years

**Pregnancy Counts and Pregnancy Rates per 1,000 Females 15-19 Years Old, for the State of Hawaii (Residents Only), by State, Mother's County of Residence, and Mother's Census Race, for the Years 2000-2012**

*This report displays the number and rate of pregnancies for females aged 15-19 years who reside in Hawaii. Pregnancies include live births, fetal deaths, and intentional terminations of pregnancy. The pregnancy rate is the number of pregnancies per 1,000 females aged 15-19 years. Data are shown by year, in descending order. The data are displayed by selected dimensions and attributes. If a dimension or attribute value is unknown for a particular record, that record is not included in the counts for that particular dimension. More detailed race data is not available because denominators are restricted by data available from the census.*
