Mortality rates are age-adjusted using the 2000 U.S. Standard Population, and YPLL is measured to age 75 years. Data are shown by year, in descending order. Data are shown by year, in descending order. The data are displayed by selected dimensions and attributes. If a dimension or attribute value is unknown for a particular record, that record will not be included in the counts for that particular dimension. More detailed race data is not available because denominators are restricted by data available from the census.
