

Participates in High HIV Risk Situations Such As Using Intravenous Drugs, Got Sexually Transmitted Diseases, Had Anal Sex without Condom (Among Adults Age 18-64) by Year Total, BRFSS Age Group, County, County and Community, DOH Race-Ethnicity, Education Level, Employment Status (Grouped), Gender, Household Income, Island, Marital Status (Grouped), Poverty Level, for the Years - 2002-2004, 2003-2005

Note: n/r (Not Reportable) - Represents cell size restriction of unweighted count < 50; n/a (Not Available) - Not asked of a subset of respondents; If a dimension value is unknown for a particular survey record, that record will not be included in the counts for that particular dimension

This report displays weighted numbers, percentages and confidence intervals for BRFSS Health Indicators. Respondents are aged 18 or older. The trend analysis page shows the trend for the selected health variable over selected years in a table and a graph. Estimated Adult Population: This number is a weighted representation of the adult population who responded to a particular question in the survey. For most questions the estimated adult population will be the entire adult population. For some secondary questions only a subset of the population was asked the question. For example, all survey participants were asked if they had diabetes, but only those who answered yes were asked if they use insulin.
