

Adults who have ever experienced non-contact sexual abuse, for the State of Hawaii, for the Year(s) - 2013

Adults who have ever experienced non-contact sexual abuse, by State, County, Island, Community, BRFSS Age Group, DOH Race-Ethnicity, Gender, Education Level, Employment Status (Grouped), Household Income, Poverty Level, Marital Status (Grouped), Married, Health Care Coverage, for the Year(s) - 2013

The trend analysis report shows the values for the selected health variable in table and graph form. Due to the addition of cell phones to the survey and changes in the weighting methodology, results from 2011 and forward cannot be trended with data from prior years. Estimated Population: This number is a weighted representation of the population who responded to a particular question in the survey. For most questions the eligible population will be the entire adult population. For some secondary questions only a subset of the population was asked the question. For example, all survey participants were asked if they had diabetes, but only those who answered yes were asked if they use insulin. If a dimension value is unknown for a particular survey record, that record will not be included in the counts for that particular dimension.

Below are the indicators included in this report and the long description for each indicator.

BRFSS Health Indicator	Health Ind Desc
Adults who have ever experienced non-contact sexual abuse	In the past 12 months, has anyone exposed you to unwanted sexual situations that did not involve physical touching? (E.g., sexual harassment, exposing sexual parts of their body to you, peeping tom, making you look at sexual photos or movies)
