

Second-Hand Smoke Exposure, for the State of Hawaii, for State and Selected Ethnicities, for the Years 2003, 2005, 2007, 2008, 2009, 2010, 2011

Note: Weighted numbers (#), percentages and 95% confidence intervals; n/r (Not Reportable) - Represents cell size restriction based on unweighted respondents; n/a (Not Available) - Not asked of a subset of respondents

The Leading Health Indicators were developed as part of the Healthy People 2010 initiative. The Leading Health Indicators (LHI) were selected to reflect the major public health concerns in the United States. Ten indicators were chosen based upon their ability to motivate action, the availability of data to measure their progress and their relevance as broad public health issues.

*This report looks at Second-Hand Smoke Exposure among youths and adults who do not smoke cigarettes:
Non-smoking youths in grades 6-12 exposed to cigarette smoking in a room or car in the past 7 days. (Source: YTS)
Non-smoking adults exposed to cigarette smoking in their home in the past 7 days. (Source: BRFSS)*

Note: This report provides only state-level data for the youth data. County-level data is not available.
