

Tobacco Use - Current Cigarette Smokers, for the State of Hawaii, for State and Selected Ethnicities, for the Year 2011

Note: Weighted numbers (#), percentages and 95% confidence intervals; n/r (Not Reportable) - Represents cell size restriction based on unweighted respondents; n/a (Not Available) - Not asked of a subset of respondents

The Leading Health Indicators were developed as part of the Healthy People initiative. The Leading Health Indicators (LHI) were selected to reflect the major public health concerns in the United States. Ten indicators were chosen based upon their ability to motivate action, the availability of data to measure their progress and their relevance as broad public health issues.

This report looks at Tobacco Use for youths and adults:

Youths in grades 6-12 who smoked cigarettes on one or more of the past 30 days. (Source: YTS)

Adults who have smoked at least 100 cigarettes in their lifetime and currently smoke some days or every day. (Source: BRFSS)
