

Employment status - retired, for the State of Hawaii, for the Year(s) - 2010, 2011, 2012

Employment status - retired, by State, County, Island, Community, Gender, HHS Age Group, DOH Race-Ethnicity, Education Level, Household Income, Poverty Level, Marital Status, for the Year(s) - 2010, 2011, 2012

The trend analysis report shows the values for the selected health variable in table and graph form. Due to the addition of cell phones to the survey and changes in the weighting methodology, results from 2010 and forward cannot be trended with data from prior years. Estimated Population: This number is a weighted representation of the population who responded to a particular question in the survey. For most questions the eligible population will be the entire adult population. For some secondary questions only a subset of the population was asked the question. If a dimension value is unknown for a particular survey record, that record will not be included in the counts for that particular dimension.

Below are the indicators included in this report and the long description for each indicator.

HHS Health Indicator	Health Indicator Description
Employment status - retired	Employment status - retired
