

## Live Births in Hawaii to Females Aged 15-19 Years

### Birth Counts and Birth Rates per 1,000 Females 15-19 Years Old, for the State of Hawaii (Residents Only), by State, Mother's County of Residence, and Mother's Census Race, for the Years 2000-2015

*This report displays the number and rate of births to females aged 15-19 years who reside in Hawaii. The birth rate is the number of live births per 1,000 females aged 15-19 years. Data are shown by year, in descending order. The data are displayed by selected dimensions and attributes. If a dimension or attribute value is unknown for a particular record, that record will not be included in the counts for that particular dimension. More detailed race data is not available because denominators are restricted by data available from the census.*
