

Infant Deaths due to Congenital Heart or Vascular Defects in Hawaii

Infant Death Counts and Mortality Rates for Deaths due to Congenital Heart or Vascular Defects for the State of Hawaii (Residents Only), by State, Mother's County of Residence, Infant's Gender, and Infant's DOH Race-Ethnicity, by 5-Year or 10-Year Aggregates, for the Years 2004-2013

This report displays number of deaths and infant mortality rate for infants less than 1 year old where the underlying cause of death is congenital heart or vascular defects (ICD-10 codes Q24-Q28). The infant mortality rate is the number of infant deaths per 1,000 live births. Data are shown by year, in descending order. The data are displayed by selected dimensions and attributes. If a dimension or attribute value is unknown for a particular record, that record will not be included in the counts for that particular dimension.
