

## Induced Terminations of Pregnancy (ITOPs) in Hawaii, by Age and Race

### Induced Terminations of Pregnancy (ITOPs), for the State of Hawaii (Residents Only), by Patient's Age and Patient's DOH Race-Ethnicity, for the Years 2000-2012

*This report displays the number of induced terminations of pregnancy (ITOPs) and the ITOPS rate for Hawaii residents. ITOPs are the purposeful interruptions of an intrauterine pregnancy with the intention other than to produce a live-born infant. The ITOPS rate is the number of ITOPs per 1,000 live births. Data are shown by year, in descending order. The data are displayed by selected dimensions and attributes. If a dimension or attribute value is unknown for a particular record, that record will not be included in the counts for that particular dimension.*
